PROFESSIONAL SUMMARY

I am a Business graduate with an MBA in Marketing and BBA in Finance & Banking allowing me hands-on experience across marketing, banking operations, and business process automation. I am skilled in market research, competitive analysis, and data-driven reporting, with a track record of building lightweight automation systems using Google Apps Script, Python, and AI platforms that reduce manual effort and improve the accuracy and speed of business reporting at minimal to zero cost. Having experience in different domains, I am comfortable operating across cross-functional environments, translating operational needs into practical, working digital solutions.

CORE SKILLS

Business & Analysis: Market research, competitor analysis, data reporting, content planning, promotional coordination, brand communication

Automation & AI: Google Apps Script, Python (Basic), GitHub Actions, workflow automation, recurring data collection, report automation, AI-assisted research & content development

Technical: Microsoft Office, Google Workspace, Power BI, VS Code, GitHub, SEO, Canva, CapCut

Languages: Bangla, English, Hindi, Spanish

EXPERIENCE

Standard MH Group | Dhaka, Bangladesh

Management Trainee (MT)

Jul 2026 – Present

- Assisting in developing and applying AI-driven solutions to improve efficiency, automate processes, and enhance data utilization across functions.
- Identifying process gaps and improvement opportunities and recommend innovative solutions, including digital and AI-based tools, to increase productivity.
- Preparing reports, dashboards, and presentations for senior management to support planning, monitoring, and review processes.
- Continuously learning and applying new technologies and business practices to contribute to organizational growth and digital transformation.

CFMOTO Bangladesh | Dhaka, Bangladesh

Marketing Intern

Mar 2026 – May 2026

- Conducted market research and competitor analysis to inform promotional planning and campaign-material coordination.
- Created multiple automated systems to reduce manual time and labor across recurring marketing and sales-support tasks.
- Supported marketing campaigns, content planning, and brand communication across motorcycle and EV product lines.
- Analyzed product USPs and briefed the sales team ahead of launches to prepare for customer queries.
- Contributed to coordination and execution of the ZEEHO brand launch event.

Sonali Bank Limited | Dhaka, Bangladesh

Intern

Jan 2023 – Mar 2023

- Completed a three-month internship supporting branch operations, documentation, and administrative processes.
- Gained direct exposure to customer service, records management, and operational workflow in a regulated banking environment.

Freelance | Remote

- Worked as a contractor on Project M, developing a communication-based platform.
- Worked as a contractor for Lingotribe, completing Bangla/English transcription assignments.
- Created guiding resources adopted by businesses looking to improve their use of everyday tools.
- Worked as an SEO-optimized content writer, producing blog posts for client campaigns.

AUTOMATION & ANALYTICS PROJECTS

- Automated Lead-Matching System** — Designed a Google Sheets and Apps Script tool that normalizes and cross-matches customer records to identify sales leads at a click, replacing a manual Excel process costing executives close to an hour daily in peak season, with matches auto-routed to Area Sales Managers.
- Cloud-Based Dealer Monitoring Pipeline** — Built a zero-cost automation system using Python, Playwright, GitHub Actions, Google Apps Script, and Google Sheets to track dealer Facebook pages daily follower counts, post frequency, post types, and captions consolidated into a performance snapshot for management review.
- Personal Portfolio Website** — Built and published a personal portfolio site using VS Code and GitHub, leveraging AI tools for development, content structuring, and rapid iteration.
- Automated Currency Tracker** — Built a tool in Python to monitor and track currency market movements.
- Desktop To-Do Application** — Personal Python project built to explore desktop application development and programming fundamentals.

EDUCATION

Institute of Business Administration (IBA), University of Dhaka — MBA, Marketing
